Lancaster Municipal Gas
DOT Qualified Plumbers

Due to Federal Pipelines Safety Regulations the contractor/plumber that installs the customer owned portion of a gas service line must be "DOT Qualified" by the natural gas provider. Many plumbers have qualified throughout the state and you are free to contact any of them. However, to prevent problems you should verify that the person performing the service line replacement has been and is currently **DOT Operator Qualified and PHMSA Drug and Alcohol compliant**. The plumber may contact Lancaster Gas at 740-687-6670 from 7:30 AM to 4:00 PM, M-F if there are any questions. Lancaster Gas' Code Book for Piping on Customer Premises' is available on the web at <http://www.ci.lancaster.oh.us/dept/gas/> and should answer most questions a plumber will have regarding replacing your service line. Your plumber must contact the gas department to re-establish gas service and must be on the job with the pressure test(s) on and holding when the gas department personnel arrives.
