Lancaster Municipal Gas
DOT Qualified Plumbers

Due to Federal Pipelines Safety Regulations any contractor/plumber who installs a customer owned portion of a gas service line must be “DOT Qualified” by the natural gas provider. In order to assist you with your search, Lancaster Gas has provided a list of local plumbing companies below that meet these qualifications.* Lancaster Gas’ Code Book for Piping on Customer Premises’ is available on the web at <http://www.ci.lancaster.oh.us/dept/gas/> and should answer most questions a plumber will have regarding replacing your service line. For re-establishment of gas service, your plumber must contact the gas department and must be on the job with the **pressure test(s) on and holding** when the gas department personnel arrive.

Locally approved plumbers include:
