LEAD-BASED PAINT: The EPA's 2008 Lead-Based Paint Renovation, Repair, and Painting (RRP) rule aims to protect the public from lead-based paint hazards associated with renovation, repair, and painting activities in homes and buildings constructed pre-1978. The rule requires contractors and their workers/employees to be certified and trained in the use of lead-safe work practices and requires RRP firms to be EPA certified. **Ohio Law prohibits contractors and/or their employees or agents from performing or authorizing any lead-related work unless the contractor and/or the employee or agent holds the appropriate lead abatement license. OAC 3701-32-03.**

Contractor hereby affirms that he/she has the appropriate lead abatement certificate/license necessary to work on a project where lead-based paint may be present. Contractor also affirms that any of its employees or agents also have the appropriate lead abatement certificate/license necessary to work on a project where lead-based paint may be present.
